The screenshot shows the inSSIDer Office application window. The interface includes a menu bar (File, View, Help), a toolbar with navigation tabs (LEARN, NETWORKS, CHANNELS, ANALYZE), and a 'metageek' logo. A '5 days remaining in trial' notification is visible in the top right. Below the toolbar are filter controls for 'SSID or Vendor', 'Channel', 'Signal', and 'Security', with a dropdown menu currently set to '802.11'. The main area displays a table of detected networks:

To the right of the table is a detailed view for the 'admin' network, showing its MAC address (0C:D6:BD:5E:68:AE), security type (WPA2-Personal), and channel/link scores (8/17). It also indicates a 'Co-Channel 1 Network' with 'Overlapping 5' and a signal strength of '-71 dBm'. Below this is a line graph showing signal strength over time. At the bottom, there are two frequency spectrum graphs for the 2.4 GHz and 5 GHz bands, with the 'admin' network highlighted in yellow.
